

P₂

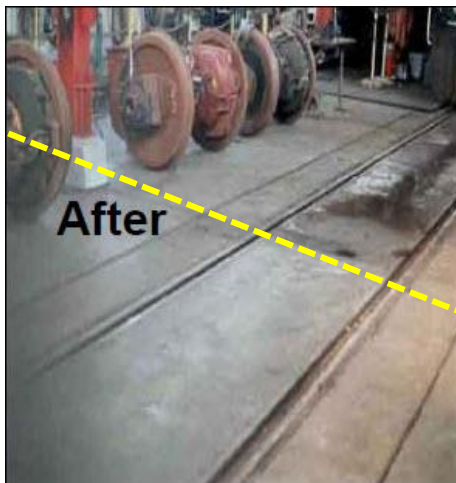

Spill Response -- Cleaner -- Degreaser

Breaks Down Petroleum Compounds including:

- ✓ Oil
- ✓ Fuels
- ✓ Hydraulic fluid

Advanced Features:

- ✓ Vapor Suppression
- ✓ Hydrocarbon Mitigation
- ✓ Biodegradable

P₂ is an environmentally friendly cleaning agent designed to provide the effectiveness of a solvent, the gentleness of a dishwashing detergent and the bio-enhancing ability of a biosurfactant. It is used effectively and economically to mitigate hazards and environmental impacts from a wide range of hydrocarbon based materials including: lube oil, crude oil, gasoline, diesel, hydraulic fluid and any petroleum hydrocarbon.

P₂ is designed for use in field environments where both the cleaning agent and resulting effluent must be environmentally sensitive. It is ideal for use on **soil, rocky areas, equipment yards, tanks, wet-wells, floors, equipment, bilge areas and more.** P₂ contains no dangerous caustics, d-limonene or solvents. Unlike many harsh degreasers, P₂ doesn't move the oily problem from one place to another, it removes and micro-emulsifies the oil, enhancing it's biodegradability.

The EPA prefers bioremediation over hazardous disposal or use of chemicals and detergents. Gold Crew P₂ micro-emulsifies petroleum hydrocarbons, making them bio-available for biological degradation.

✓ Safe ✓ Non-Toxic ✓ Biodegradable
